

HPA-050

Australia

Aroma & flavour

Citrus

Lime, Grapefruit

Sweet Fruits

Apricot

Breeding

HPA-050 was created by the HPA breeding program in 2010 through a cross-pollination of Japanese, European, and Wye College hops descended from Northern Brewer and Neomexicanus.

Growing

HPA-050 has been producing consistent yields in field trials since 2015.

Contracting

HPA-050 has been producing consistent flavour impact in brewing trials since 2019, and will remain in HPA's breeding program for now, pending changes in consumer tastes.

Analytical data

Alpha 11.0 %

Beta 7.3 %

Cohumulone 36.0 % of α -acids

Total oil 2.7 ml/100g

Note: HPA's Next in Bine experimental hops may become unavailable in future years. A very select few will be commercialised based on meeting our agronomic objectives and achieving brewer acceptance.
